EDUCATION

University of Illinois at Urbana-Champaign

Bachelor of Science in Computer Science

May 2026

Current GPA: 4.0/4.0

SKILLS

Languages: Python, JavaScript, TypeScript, C++, Java, HTML, CSS, SQL, R

Tools: React.js, Git/GitHub, Flask, Node.js, Express.js, Pandas, MongoDB, OpenCV, Jest, Vite, Android Studio

PROJECTS

Data Science Mastery Platform | *TypeScript, Node.js, Express.js, SQLite, Git, Jest* Oct 2023 - Present

- Developing a virtual learning platform used by over 1000 students in University of Illinois data science coursework
- Working with Professor Wade Fagen-Ulmschneider to scale the platform and create unit tests

Hack4Impact: IStem Library | *React, TypeScript, Node.js, Express.js, CSS, MongoDB, Git* Sept 2023 - Present

- Creating the largest online library of accessible materials for international nonprofit Inclusive STEM
- Using MERN tech stack to develop front- and back-end interface

StoryStream | *Flask, Python, Javascript, HTML, CSS, BeautifulSoup, Git* July 2023 - August 2023

- Optimized displaying long pieces of text through parsing into paragraphs and adding styling
- Utilized BeautifulSoup Python library to scrape texts from a website and parse results
- Website was created in Flask and had login and file upload functionality

SpotifyAI | *Javascript, HTML, CSS, Spotify API, Git* March 2023 – June 2023

- Designed and built interactive web interface to synthesize and display statistics from a user's Spotify account
- Pulled data from Spotify API to play songs and analyze listening data for various time ranges.
- User authentication via Spotify OAuth

RoboBoat | *Flask, Python, Javascript, HTML, CSS, Git* August 2022 - June 2023

- Worked with a team of 10 students in the Computer Systems Research Lab to build an autonomous robotic boat.
- Served as Groundstation Lead; built a frontend and backend web interface to display boat statistics and allow the user to interact with the boat by selecting task number.

Undergraduate Depression Data Analysis | *R, ggplot, dplyr, Neural Networks* July 2022 - August 2022

- Wharton Data Science Academy collaborative project
- Used statistical analysis and visualization in R to explore the risk factors and demographics of depression and other mental health issues in college undergraduates.
- Final neural network model could predict suicidal ideation in college students with over 82% accuracy

States Minesweeper | *Node.js, Express.js, HTML, CSS, Javascript, HBS* May 2022 - June 2022

- Minesweeper spinoff game created in Node.js using SVG United States map as base template
- Incorporated color-coded game cues, OAuth login functionality, and a continually-updated leaderboard

VOLUNTEER WORK

Girls Who Math | *Python Teacher* July 2022 - August 2022

Taught a group of girls intermediate computer science concepts over Zoom; designed labs, lessons, and demos in python covering object-oriented programming and other coding concepts.

Glasgow Engineering, Math, and Science | *President* 2019-2023

Designed and facilitated creative STEM lessons for local middle schoolers; trained new members in lesson making

Other Tutoring & Volunteering | *Math, Computer Science, SAT, and Physics Tutor* 2018 - 2023

Schoolhouse.world, FCPS Student Tutoring Association, TJHSST Peer Tutoring, Women in Science & Engineering

RELEVANT COURSEWORK

Artificial Intelligence 1&2, Web App Development, Mobile App Development, Computer Vision 1&2, AP Computer Science A, Intro to Programming II, Calculus III, Discrete Mathematics, Linear Algebra, AP Statistics
